Pitches by Healthcare Innovation Canada

3:45 - 4:00 PM

Connecting Dots, Transforming Lives

4:00 - 5:00 PM

International Networking Drinks

ARTIFICIAL INTELLIGENCE COLLABORATION CENTRE

<http://www.aicc.co/>

The Artificial Intelligence Collaboration Centre (AICC) is a £16.3 million, ground-breaking initiative led by Ulster University in partnership with Queen's University Belfast, supported by Invest Northern Ireland and the Department for the Economy. Its mission is to drive awareness, adoption, and responsible use of AI across Northern Ireland, helping SMEs and industries boost productivity, competitiveness, and innovation. Through collaborative innovation, fully funded consultancy, postgraduate and short courses, community-building events and cutting-edge research, the AICC equips businesses and professionals with the skills, tools and support needed to succeed in an AI-driven world.

AEYE HEALTH

<https://www.aeyehealth.com/aeye-diagnostic-screening>

AEYE Health is a digital health company that prevents blindness by providing fully autonomous, AI-based diagnostic screening solutions for retinal imaging with best-in-class clinical results and superior usability. AEYE-DS, company's flagship product, enables point-of-care screening for diabetic retinopathy to ensure that diabetics are regularly screened for diabetic retinopathy using AI, without the need for physician interpretation. It is the only FDA-cleared autonomous AI for diabetic retinopathy that is approved for a portable camera and also the only one that requires just one image per eye for the analysis. AEYE-DS is now the fastest growing solution for diabetic retinopathy screening in the United States!

BIOSTL

<https://www.biostl.org/>

Founded in 2001, BioSTL has been a cornerstone of St. Louis' innovation landscape, fostering a dynamic economy through convening stakeholders, engaging in public policy, and delivering targeted programs. Our mission is to elevate St. Louis' global leadership in solving challenges in human health and agriculture. BioSTL leads nationally acclaimed initiatives in three key areas: startup creation and investment, sourcing innovation for impact in our region, and developing an equitable bioscience workforce. BioSTL is a nonprofit 501 (c)(3) funded by charitable contributions and grants targeting the future of St. Louis.

DARTMOUTH COLLEGE

<https://home.dartmouth.edu/>

DARTMOUTH

Dartmouth College is an Ivy League research university in Hanover, New Hampshire. Dartmouth College's Cluster for Improving Healthcare Outcomes through Sensory Technology unites Arts & Sciences, Geisel, Thayer, and Tuck to design, validate, and translate sensory technologies to improved care. The Cluster focuses on empowering patients with personalized health insights and interventions, and enabling caregivers from the family to the clinician to provide better support for the patient.

GENACROSS LUTHERAN SERVICES

<https://genacrosslutheranservices.org/>

Genacross Lutheran Services provides care for youth, families & seniors in multiple settings. Genacross is developing CareAxis, a next generation healthcare core coordination platform designed to revolutionize chronic care management. CareAxis proactively identifies resident health episodes. Empowers residents through education, integrates with existing systems, and delivers actionable insights to enhance quality outcomes and reduce cost.

GLOBAL HEALTH INNOVATORS

<https://globalhealthinnovatorsnashville.com/>

Global Health Innovators is supported by the Nashville Area Chamber of Commerce, in partnership with organizations contributing to the economic development of domestic and international health ecosystems, providing meaningful conversations and collaborations to address macro challenges in healthcare - aging populations, rising cost of care, and critical workforce challenges. Learnings of unique similarities and differences allows organizations to develop meaningful relationships and address challenges through exponential innovations in the industry.

GREATER GAIN GROUP

<https://www.gretergaingroup.com/>

Greater Gain Group helps early-stage B2B companies that sell into healthcare—spanning healthtech, medtech, and digital health—launch and scale in the US market. We work with bootstrapped and funded teams (Seed to Series B) navigating regulatory complexity, long sales cycles, and multi-stakeholder buying processes. Our fixed-scope programs and fractional CRO support help teams transition from founder-led selling to repeatable, capital-efficient growth.

HEALTHCARE INNOVATION FROM CANADA

<https://healthcareinnovationcanada.com/>

Canada boasts a dynamic healthtech ecosystem, with the Healthcare Innovation from Canada consortium connecting you to top startups in Digital Health, MedTech and Agtech. We help high-potential startups scale quickly, raise capital, and build strategic customer connections. Our consortium offers investors, clinical and business stakeholders, direct access to some of the most innovative healthcare solutions.

INNOVATION NORWAY

<https://en.innovasjon Norge.no/>

Innovation Norway is the Norwegian Government's primary instrument for fostering innovation and development within Norwegian enterprises and industry. They support companies by providing access to competence, capital, and networks, helping them grow sustainably and increase exports. Their services cover various stages of business development, from startups to established companies, and span multiple sectors, including agriculture and international markets.

IO HEALTH TECHNOLOGIES

<https://iohealth.ai/>

io Health makes Home Health documentation more accurate, faster and easier. Designed by a Home Health veteran for Home Health and Hospice organizations, io provides real-time chart validation, scales performance management, and enhances financial outcomes. Implementation is quick, easy and frictionless, with no changes in clinical workflows required.

KEMTAI

<https://kentai.com/>

Kemtai empowers hospitals and health systems to increase patient exercise adherence for better outcomes and scale physical therapy and rehab services. Leverage Kemtai for guided rehab sessions, digital assessments, and granular adherence¹ and performance tracking—scaling your staff capacity and expanding access to care.

LIRIO

<http://www.lirio.com/>

Lirio is the personalization engine for digital health that combines behavioral science and AI to power hyper-personalized health consumer experiences that meaningfully improve outcomes. Our Precision Nudging® Interventions are designed to overcome specific barriers and move people to take action for better health.

ManagingLife

MANAGINGLIFE

<https://managinglife.com/>

ManagingLife is transforming how chronic pain is understood and managed. Its clinically validated digital solution, Manage My Pain, closes the gap in pain care by helping people track and communicate their symptoms while empowering them through evidence-based pain psychology. With over 125,000 users across 130+ countries, it is the most downloaded and top-rated pain app in the world, and powers the largest real-world dataset of patient-reported pain outcomes. ManagingLife partners with leaders like Unum and University Health Network to improve outcomes, reduce costs, and prevent disability. At HLTH 2025, the company will launch Solace, the first generative AI pain “psychologist,” delivering cost-effective and scalable pain psychology to everyone, everywhere, at any time.

MANETU

<https://www.manetu.com/>

Manetu is a global leader in policy-based governance and knowledge protection, providing enterprises with the ability to secure not just their data, but also the insights, relationships, and decisions generated by AI systems. Our platform delivers fine-grained control at the data-field and API level, enabling organizations to enforce policies across complex, multi-cloud, and agentic environments—ensuring security, compliance, and trust at scale.

Operating worldwide, Manetu partners with enterprises, technology providers, and standards bodies to shape the future of AI governance. From financial services to healthcare to government, we enable organizations to safeguard their most critical asset: knowledge. By embedding governance directly into infrastructure, Manetu empowers enterprises to innovate responsibly while staying ahead of emerging risks in the age of Agentic AI.

MARCH HEALTH

<https://www.march.health>

Transforming Precision Health by Digital Twins & Agents

Our real-time clinical assistant, integrated with the EHR, works across cardiovascular, cancer, women's health, and beyond saving lives & billions in avoidable costs.

- Top 10 U.S. healthcare company, selected by the U.S. Trade Commission
 - Backed by Mayo Clinic Platform, the world's #1 hospital system
 - Techstars alumnus, global healthtech accelerator network
 - Featured by NVIDIA, selected among 40K+ startups on World Health Day
-

MEDME HEALTH

<https://www.medmehealth.com/us>

MedMe is an all-in-one pharmacy care management and medical billing platform with a suite of AI assistants designed to help pharmacies grow their clinical revenue. Today, MedMe is trusted by 4,500 pharmacies to run more than 30 types of services, from immunizations and prescribing to chronic disease management and point-of-care testing. With more than 25 million appointments facilitated, MedMe helps pharmacies unlock new clinical revenue while saving time and improving patient care.

NASHVILLE AREA CHAMBER OF COMMERCE

<https://nashvillechamber.com/>

The Nashville Area Chamber of Commerce is Middle Tennessee's leading business organization, dedicated to driving regional prosperity through economic development, advocacy, and community leadership. As the primary point of contact for companies considering investment or expansion in the region, the Chamber highlights Nashville's global leadership in health care, alongside strengths in technology and music, while advancing strategies to attract talent, support innovation, and grow international business.

NASHVILLE ENTREPRENEUR CENTER

<https://ec.co/accelerators/project-healthcare/>

Nashville Entrepreneur Center is working to make Nashville the best place to start and grow a business by increasing the likelihood of success for entrepreneurs. It does this through its vibrant community, connections to resources and mentors, and running five accelerator programs, including Project Healthcare.

NESA

<http://nesasolutions.com/>

NESA's AI-powered platform is uniquely embedded directly in the EHR enabling single sign-on, virtual care, and documentation all within the electronic health record environment. NESA supports comprehensive virtual care workflows, including virtual nursing, virtual sitting, interdisciplinary rounding, consultations, patient education, staff safety monitoring and behavioral health monitoring. These functions significantly enhance both patient outcomes and staff efficiency.

By empowering healthcare professionals to make more data-driven, real-time decisions, NESA greatly improves the delivery and timeliness of care.

ONAWAVE MEDICAL

<https://onawavemedical.com/>

OnaWave Medical is developing a digital biomarker-based risk-stratification platform with associated wearable solutions that can identify patients with pelvic conditions, such as endometriosis and subfertility, to support clinical decision-making and enhance the delivery of personalised care for the individual.

ONE LIFE SCIENCE

<http://www.olsrec.com/>

At One Life Science, we are dedicated to bridging the gap between innovation and expertise in the life sciences industry. Our mission is to empower organizations by providing tailored consulting, recruitment, and advisory services that drive growth, enhance operational efficiency, and foster a culture of excellence.

ORION HEALTH

<https://orionhealth.com/us/>

HEALWELL AI

Orion Health and HEALWELL AI deliver real-world tools, validated in clinical settings and supported by over 50 peer-reviewed publications, to help health systems turn clinical text into action, reduce follow-up delays, and surface missed care opportunities. Our technology fits into existing workflows, making data more actionable with minimal lift and helping systems do more with the data they already have.

PROVISIONS GROUP

<http://provisionsgroup.com/>

Founded in 2003, Provisions Group blends two decades of elite consulting and staffing expertise into a single mission: helping healthcare organizations optimize the patient journey to unlock profitable growth. From our headquarters in Franklin, TN, we align people, processes, and technology to turn operational complexity into clarity, uniting revenue-generation disciplines like marketing, martech, and CRM with deep EHR workflow refinement and the custom development, cloud, and data engineering that power them behind the scenes.

With more than 6,000 hard-to-find technologists placed and 1,000+ clients served, providers choose us because we improve care quality, streamline operations, and accelerate top-line results through one tightly integrated partnership. Recognized three consecutive years by the Nashville Business Journal as a Best Place to Work and a Top-10 firm in technology, recruiting, management consulting, and Healthcare IT, Provisions Group remains the growth engine trusted by healthcare organizations in Middle Tennessee and beyond. Discover more at provisionsgroup.com.

SAFETY NET CONNECT

<https://safetyconnect.com/>

Safety Net Connect delivers innovative digital solutions that enhance access to care and improve outcomes for vulnerable populations. Our platforms help healthcare organizations and social service providers streamline communication, coordinate services, and deliver timely, equitable care. With a focus on usability, integration, and impact, Safety Net Connect is transforming how communities connect to health and social services.

SHUFFLL

<https://shuffll.com/>

Shuffll is the programmable infrastructure layer powering enterprise-grade video creation at scale - think "Stripe for video." We embed AI-driven, human-orchestrated video workflows directly into partner platforms via API, iFrame, or white-label deployments, enabling teams to generate personalized, brand-safe content on demand. Backed by a data flywheel and workflow-native integrations, Shuffll is trusted by global enterprises to automate video creation, routing, customization, and delivery across marketing, sales, and support.

As we continue our rapid growth, we're building a culture of collaboration, creativity, and continuous learning. If you're passionate about crafting intuitive, scalable experiences and thrive in a fast-paced, mission-driven environment, come help us redefine how businesses communicate with video.

SILVERSURFERS.AI

<http://silversurfers.ai/>

SilverSurfers.AI is the world's first independent rating system that evaluates digital platforms for usability and accessibility by adults aged 50 and older. Our mission is to empower older adults to confidently engage online while helping businesses design older adult-friendly digital experiences to tap into the \$8.3 trillion market opportunity.

SITNSTAND

<http://www.sitnstand.com/>

SitnStand delivers innovative, breakthrough solutions in fall prevention & recovery for safe patient handling and mobility. Our technologies support hospitals, nursing homes, rehabilitation centers, and EMS teams by improving SPHM, enabling early mobility, and reducing the physical strain and injury risks for healthcare staff. With portable, easy-to-use designs, we empower institutions to deliver safer, more efficient, and dignified care.

SUBFLOW

<https://www.subflow.com/>

Subflow Health powers streamlined clinical workflows for ASCs, physical therapy clinics, specialty practices, and payers nationwide. From intake and referrals to post-visit follow-ups and ongoing patient/member care, providers rely on Subflow to cut administrative burden, boost patient adherence, automate communications, and improve outcomes — all while capturing actionable data that drives better decisions.
