UNRAVELLING TELECOMS & THE DIGITAL FUTURE

Disability in an increasingly digital world

Chris Lewis

Increasing Options for Communications

Technology - helping with every condition

Head-mounted wand

Brainwave reader

Smart glasses

Hearing device

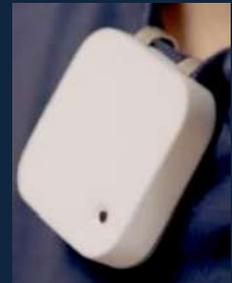

Camera necklace

Skin patches

Safety monitor

Internal chips

Smart watch

Smart bracelet

Smart clothing

Smart ring

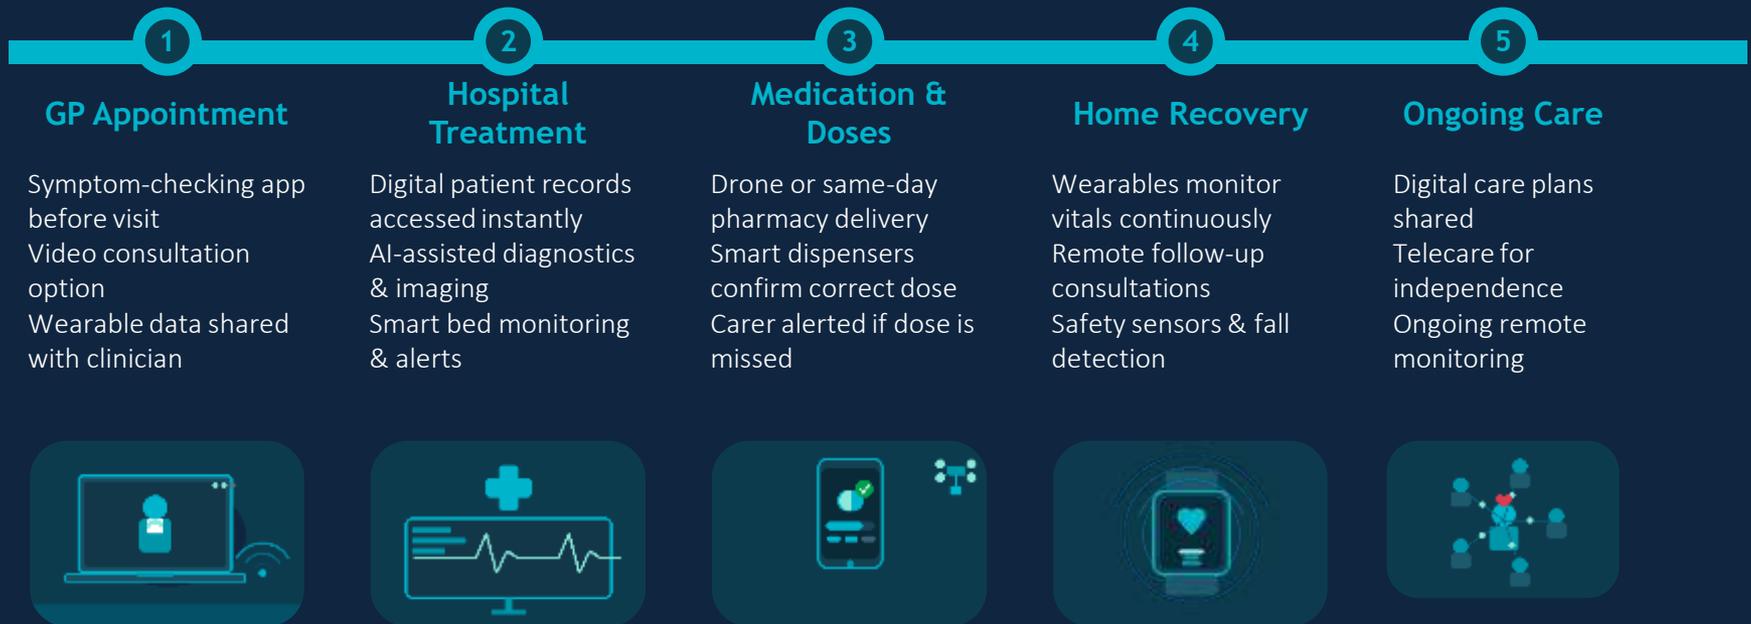

Smart inner-soles

Smarter individual, inside a Smarter Home, in a Smarter Society

Healthcare: The Technology-Supported Patient Journey

Disability is a stress test for design. If it works at the edge, it works everywhere

Design for these users...

- Blind or low vision
- Deaf or hard of hearing
- Cognitive overload or brain fog
- Limited dexterity or impairment
- Low digital confidence or language

...and you improve it for everyone

UNRAVELLING TELECOMS & THE DIGITAL FUTURE

**Are we building a system patients can access,
or one they have to adapt to?**
